

Ali Bars

London, UK | alibars999@gmail.com | linkedin.com/in/alibars | github.com/AliBars19

EDUCATION

City, University of London

London, UK

BSc Computer Science (Predicted First, 1:1)

Sept. 2024 – July 2027

- **Relevant Modules:** Data Structures & Algorithms, Databases, Operating Systems, Systems Architecture, Network Systems, Language Processors, Team Project

EXPERIENCE

Founder & Lead Engineer

Mar. 2026 – Present

Crumbify Ltd

London, UK

- Sole founder and engineer of a social food-discovery iOS app, built in React Native, Expo and TypeScript on a Supabase (Postgres) backend.
- Designed a local-first architecture (on-device SQLite synced to Postgres with row-level security) so the app stays fast offline and fetches minimally on cold start.
- Took the product from concept to v1.0.0 App Store submission solo, covering TestFlight beta cycles, RevenueCat subscriptions, AdMob and EU DSA trader compliance, while running Crumbify Ltd as sole director.

Data Acquisition & Firmware Engineer

Aug. 2025 – Present

City Racing (Formula Student)

London, UK

- Building a live telemetry pipeline in Python (cantools, mcap) that decodes CAN bus frames from the car and streams them over WebSocket into Foxglove for an F1-style live dashboard.
- Wrote a C++ tool that projects logged GPS data points onto satellite maps of the FSUK circuit, pinpointing where simulated and measured laps diverge and sharply reducing debugging time.
- Built and deployed the team site (csg.racing) in React and Next.js with responsive multi-level navigation, dark mode and embedded video, materially increasing visitor engagement.

Customer Ordering Desk

Sept. 2024 – Present

Fortnum & Mason

Piccadilly, London

- Run 200+ stock, shipping and pricing queries per week in Microsoft Dynamics 365, coordinating weekly price updates across 50 products between warehouse, retail and customer teams.

PROJECTS

Video Automation Pipeline | Python, ffmpeg, OpenAI Whisper, JSX, AWS EC2

2025

- Built a batch pipeline processing 50+ audio jobs per run: ffmpeg extraction and trimming, dominant-colour analysis, and Whisper transcription producing word-level timestamps.
- Scripted Adobe After Effects via JSX to assemble templated compositions, apply colour grading, sync timed lyrics and queue 12+ renders per run on AWS EC2, removing the manual editing step entirely.
- This pipeline results in a TikTok page totaling 25K followers, 7.1M likes and 60M+ views in total.

Automated Publishing Platform | Next.js, TypeScript, OAuth

2025

- Next.js service that schedules and publishes to TikTok and YouTube through OAuth-integrated APIs, parsing filenames into per-platform metadata and tracking publish state across both.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C++, SQL, C#, Go

Frameworks & Libraries: React, React Native, Next.js, Node.js, Expo, Supabase (Postgres), OpenAI Whisper

Developer Tools: Git, AWS (EC2), Jira, VS Code, JetBrains IDEs, Visual Studio, Microsoft Dynamics 365
